Education

University of California, Los Angeles Expected June 2028
B.S. in Computer Science *Los Angeles, CA*

GPA: 3.982
Relevant Courses: Algorithms & Complexity, Operating Systems, Programming Languages, Software Construction, Computer Architecture

Experience

Art of Problem Solving June 2026 – August 2026
Software Engineer Intern — Operations Hub *San Diego, CA*

- Rebuilt an operations account-history tool with TypeScript, Fastify, PostgreSQL, and AWS EC2, adding batched username resolution, human-readable event summaries, and a resizable data grid with pagination, filtering, and sorting.
- Expanded backend-to-Salesforce synchronization to holidays, courses, and classes using custom Apex REST resources, SOQL queries, and 6 TypeScript gateway endpoints for individual and bulk upserts.
- Developed and tested website redesign components serving 100K+ monthly users, streamlined GitHub Actions CI/CD, and helped shape account-model and message-bus architecture across 5+ microservices.

UCSD San Diego Supercomputer Center June 2023 – August 2023
Research Intern *San Diego, CA*

- Benchmarked machine learning models (Random Forest, KNN, SVM, and Naive Bayes) on genomic datasets using Excel, Python, scikit-learn, R, and WEKA to support early prostate cancer diagnosis.
- Presented a machine learning model achieving 90%+ accuracy at a research symposium to 50+ peers and professors from institutions including Yale and UCSD.

Activities

LA Hacks October 2024 – Present
Tech Coordinator / Finance Director *Los Angeles, CA*

- Oversee a $150,000+ annual budget for LA's largest collegiate hackathon, tracking expenses, processing reimbursements, and coordinating with UCLA administrative offices to maintain fiscal and event compliance.
- Lead nonprofit and fundraising initiatives, securing 501(c)(3) approval and $25,000+ in UCLA grant funding through grant proposals and crowdfunding outreach.
- Build and maintain the annual event website and internal tools for application review, applicant management, and event analytics.

CyberAegis Team September 2019 – June 2024
Linux Lead *San Diego, CA*

- Placed in the top 1% nationally among 2,500+ CyberPatriot teams for 5 consecutive years, specializing in Linux, Windows, and networking technologies including DHCP, DNS, and routing.
- Coordinated weekly cybersecurity training for 100+ students, managing schedules and evaluating progress.

Projects

BruinBite | *Go, Next.js, PostgreSQL* | GitHub May 2025

- Designed database schema and implemented RESTful API routes with Golang for users to view UCLA dining hall menus, submit ratings of dishes, and manage social connections as part of a 6-person team.
- Built dynamic frontend components for interactive menu displays, user-submitted ratings, and user profile management.

Trello Notion Sync | *JavaScript* | GitHub March 2024

- Automated synchronization of Trello cards with Notion databases using JavaScript and ngrok.
- Implemented webhooks and deployed on a local Linux server.

Skills

Languages: Python, Java, JavaScript, TypeScript, C++, Go, PHP, Bash, SQL
Frameworks: Node.js, Next.js, React, Fastify, Pandas, Spring Boot
Technologies: Git, GitHub, Docker, Salesforce, AWS, Unix-based systems, Wireshark, VMware, PostgreSQL, MySQL
